

iPhone iMovie Templates & photo processing

1. Use iMovie templates to create Hollywood-style movie trailers (預告影片)
2. Use Photos app to edit photos and videos; Any edits you make are saved across all your devices.
 - Duplicate your photo/video before click to Edit it.
 - Adjust light and color
 - Apply filter effects (濾鏡)
 - Crop, rotate, or flip a photo or video
 - Straighten via adjusting perspective (調整視角可以把圖像拉直或拉平)
 - Mark up a photo (在照片上加標示：例如各種顏色粗細的筆、形狀、箭頭指標，中英文字，簽名，放大鏡等)
 - Revert an edited photo (回復原狀)
 - Trim a video
 - Set the slow-motion section of a video shot in Slo-mo (更改以Slo-mo拍攝的視頻的慢動作部分)
3. Bonus: How to capture a screen image on iPhone (截圖, 截屏)
4. Bonus: How to convert an image containing text to a text file, using LINE app (如何將包含文字的圖像轉換為文字檔)

Create an iMovie "Trailer" Project

4 Notice: We'll use Photos app

to access all photos/videos during creating "Trailer" project.

iMovie provides 14 trailer templates

Edit Actions...

This video is saved to Photos app.

Note: This video file extension name is ".MOV", not ".MP4".

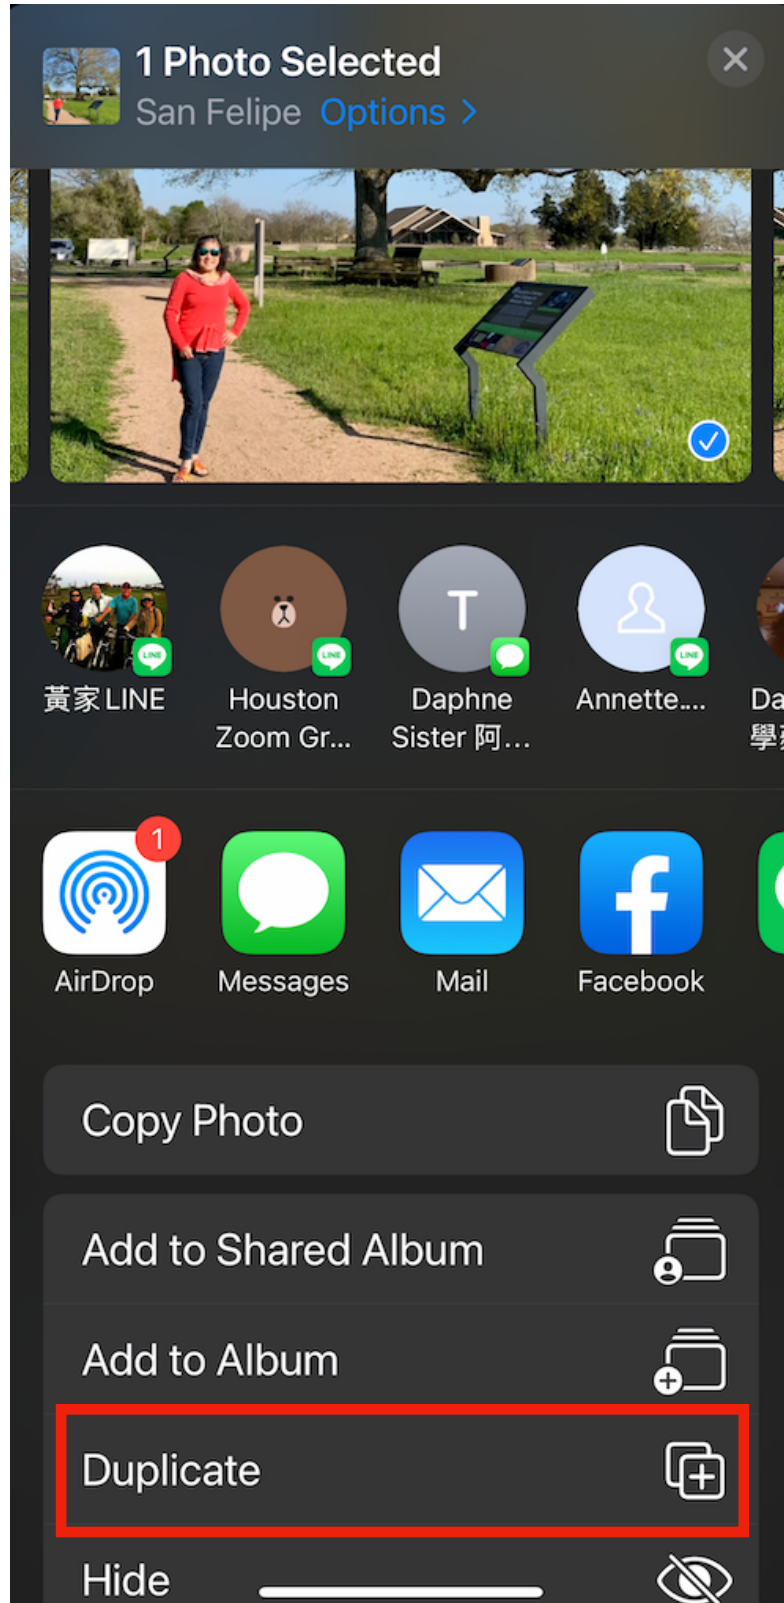

Duplicate your photo/video before click to Edit it.

3

1

2

The duplicated photo/video is stored back to the Photos app with the same time stamp, GPS ... info as the original one.

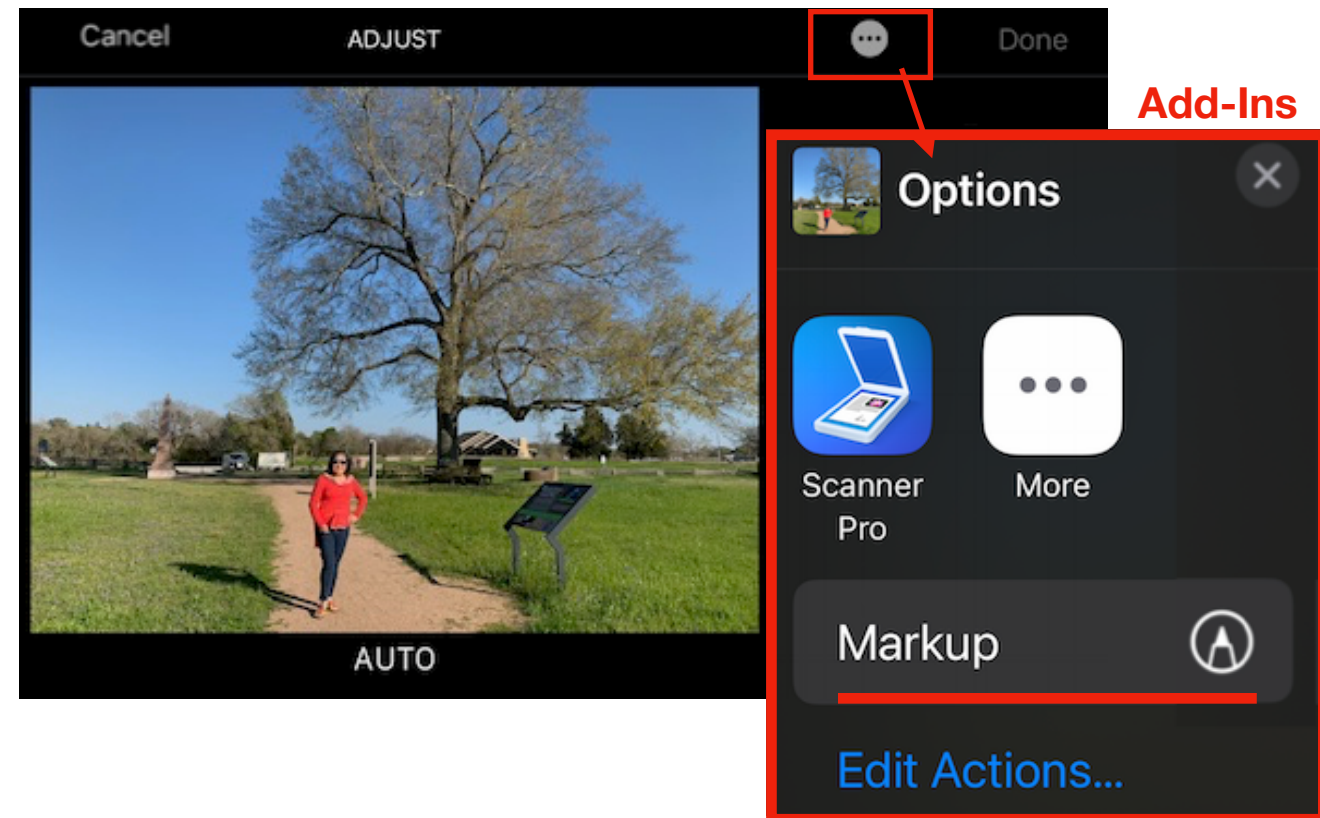

Notice: Your edited photo/video is to replace your original one.

Photos app Edit function contains four categories: Adjust, Filters, Crop and Add-Ins.

Video Editing adds one more category:

Adjust light and color for photo/video

1. In Photos, tap a photo or video thumbnail (縮略圖) to view it in full screen

2. Tap Edit, then swipe left under the photo to view the editing buttons for each effect such as Exposure(曝光), Brilliance(增艷), and Highlights(亮部), Shadow (陰影), Contrast (對比), Brightness(亮度), Black Point(黑點), Saturation (飽和度), Vibrance(自然飽和度), Warmth(色溫), Tint(色調), Sharpness (清晰度), Definition (畫質), Noise Reduction (雜點消除), Vignette (暈邊)。

3. Tap a button, then drag the slider to adjust the effect. The level of adjustment you make for each effect is displayed by the outline around the button, so you can see at a glance which effects have been increased or decreased.

4. To review the effect, tap **the photo image** to see the shot before and after the effect was applied (or tap the photo to toggle between the edited version and the original).

5. Tap Done to save your edits, or if you don't like your changes, tap Cancel, then tap Discard Changes.

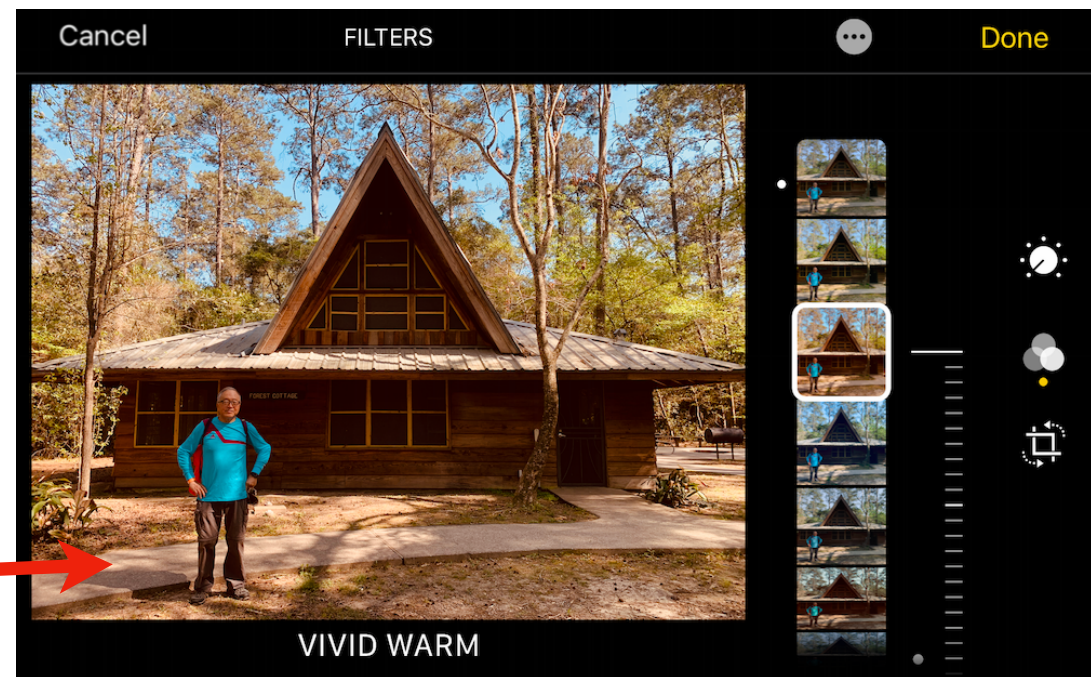

建議：點擊

可自動編輯帶有效果的照片或視頻。

Apply filter effects 濾鏡

1. In Photos, tap a photo or video thumbnail to view it in full screen.
2. Tap Edit, then tap  to apply filter effects, such as Vivid(鮮豔), Vivid Warm (鮮豔暖色), Vivid Cool(鮮豔冷色), Dramatic(戲劇), Dramatic Warm (戲劇暖色), Dramatic Cool (戲劇冷色), Mono (黑白), Silver tone (銀色調), Noir (復古).
3. Tap a filter, then drag the slider to adjust the effect. (from 100% downward)
4. To compare the edited photo to the original, tap **the photo image**.
5. Tap Done to save your edits, or if you don't like your changes, tap Cancel, then tap Discard Changes.

Crop, rotate, or flip a photo/video

1. In Photos, tap a photo or video thumbnail to view it in full screen.

2. Tap Edit, tap , then do any of the following:

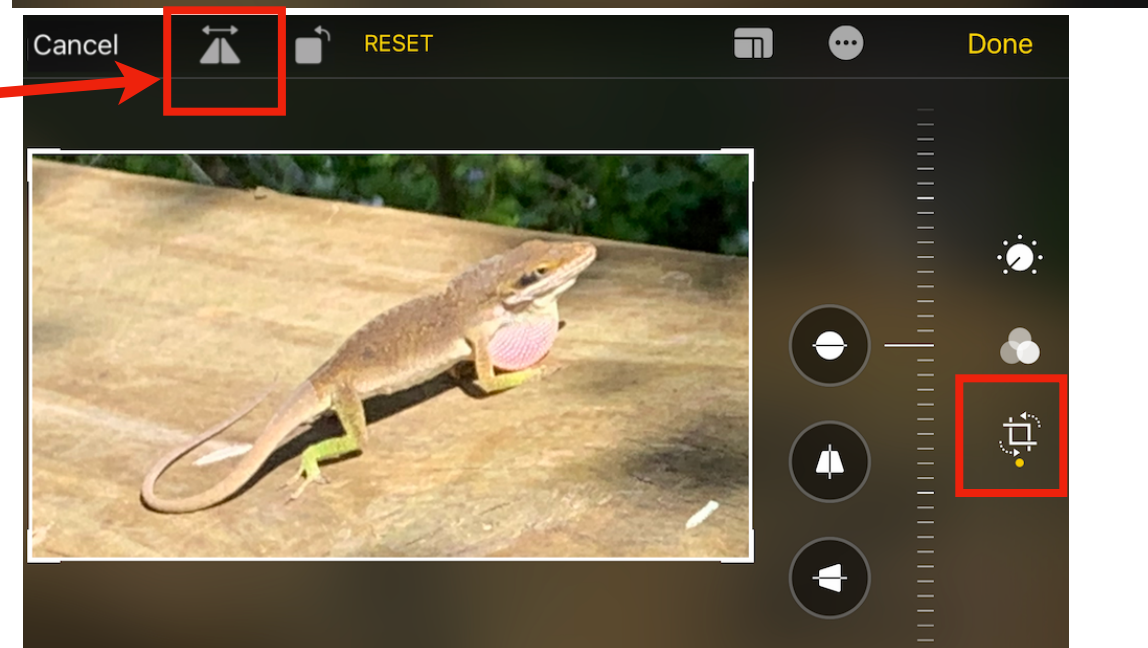

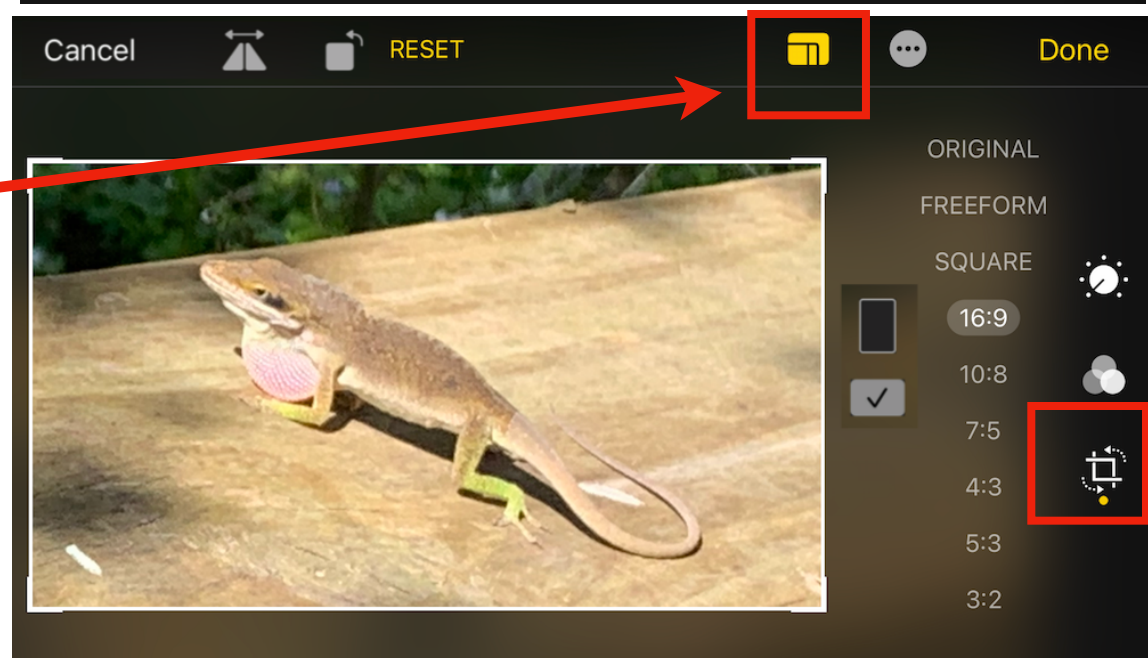

- Crop manually: Drag the rectangle corners to enclose the area you want to keep in the photo, or you can pinch the photo open or closed.

- Crop to a standard preset ratio: Tap , then choose a ratio like Square, 16:9, 10:8, 7:5, 4:3, 5:3, 3:2.

- Rotate: Tap  to rotate the photo 90 degrees.

- Flip: Tap  to flip the image horizontally.

3. Tap Done to save your edits, or if you don't like your changes, tap Cancel, then tap Discard Changes.

Straighten via adjust perspective 調整視角可拉直拉平

1. In Photos, tap a photo or video thumbnail to view it in full screen.
2. Tap Edit, then tap .
3. Select an effect button to tilt , adjust vertical perspective , or adjust horizontal perspective .
4. Drag the slider to adjust the effect. The level of adjustment you make for each effect is displayed by the yellow outline around the button, so you can see at a glance which effects have been increased or decreased. **Tap the button to toggle between the edited effect and the original.**
5. Tap Done to save your edits.

How to capture a screen image on iPhone (截圖)

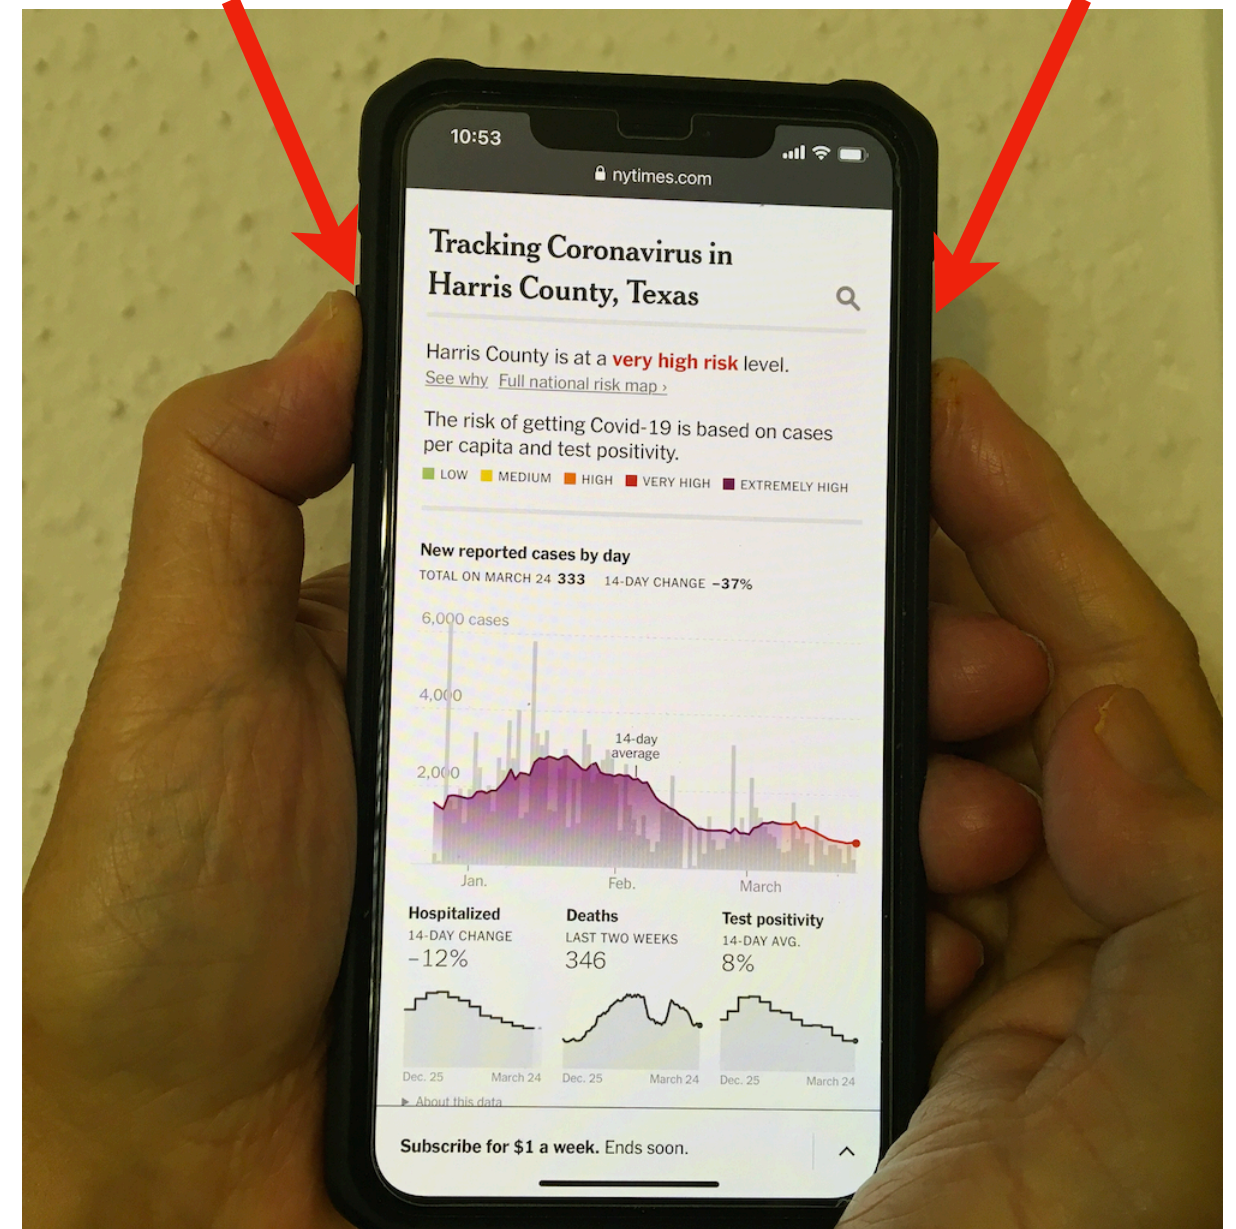

Power On/Off button

Volume up button

Power On/Off button

Home button

1. Press the power on/off Button and the Home button at the same time.
2. Quickly release both buttons

1. Press the power on/off Button and the Volume Up button at the same time.
2. Quickly release both buttons

3. 截屏後，縮略圖(thumbnail)會暫時出現在屏幕的左下角。點擊縮略圖以將其打開，或向左滑動以將其關閉。

4. The screenshot is to be stored in Photos app.

How to convert an image containing text to a text file, using LINE app

介紹一個 LINE app 的新功能: 將包含文字的圖像轉換為文字檔.

當圖片或照片裏有文字時，可以在看圖片時，按它右上方的「A」，就可以直接翻譯，也將文字的影像直接轉文字檔，還可以「複製」到一般文字檔以利閱讀和轉傳…。

例如右圖就可以按「A」改成文字檔：

今天是3月4日
 這天是個好日子
 可以挑3撿4
 可以說3道4
 可以丟3落4
 可以顛3倒4
 可以勾3塔4
 還可以不3不4
 更可以朝3暮4
 一年也就這麼一天可以亂來
 希望親愛的朋友們
 大家一起3盟海4
 快樂每一日
 開心每一天
